

We provide IT education to any disabled and free website development to any registered non-profit charity.

We have provided the New Zealand disability community with free IT education, hardware, software, and free website development for registered charities for eight years. We won the Access Alliance 2021 best education website.

We host, develop and maintain websites, for non-profit community organisations and coach the mentally and physically impaired using video tutorials. We are a unique team that includes both physically impaired and able-bodied professional volunteers.

We have the relevant skills needed to coach students among our stream of volunteers from Volunteer Auckland and trustees.
