

**LYMPHEDIVAS GARMENTS - AVAILABLE EXCLUSIVELY AT DRC SOUTHLAND  
- NEW ZEALAND'S ONLY STOCKIST**

**TRUE COMFORT AND FIT**

Lightweight, breathable, seamless design with stretch allowing the garment to conform around your arm and hand, reducing binding at elbow and in between fingers and eliminates finger webbing irritation (when wearing a glove).

**HYPOALLERGENIC**

100% latex and silicone free.

**MOISTURE WICKING**

State-of-the art moisture-wicking fabric that keeps your arm cool and dry.

**CORRECT FINGER COMPRESSION**

Gloves deliver graduated compression through the fingers and palm, pumping lymphatic fluid up and toward the body and reducing swelling.

**NO DOUBLE COMPRESSION**

When you get a glove to be worn with a sleeve, you can rest assured, the glove does not provide double compression at the wrist when worn with an arm sleeve.

**GARMENT CREATION**

LymphedIVAS garments were created by two women with lymphedema who wanted to develop a medical-grade garment they would want to wear.

**DRC Southland**
